

## Demo Air Cabin Crew SOP - Chapter 5 Turbulence (Rev 4)

5.1 Light turbulence: The seat belt sign is on. Crew check that passengers are seated, secure carts and continue service with care.

5.2 Moderate turbulence: Stop the service immediately, secure carts and galley equipment, and crew take the nearest seat and fasten their harness.

5.3 Severe turbulence: Crew sit down immediately wherever they are and secure themselves. No service or cabin checks until the flight deck announces it is safe.

## Chapter 6 Medical Events (Rev 4)

6.1 For any unwell passenger, inform the flight deck and ask for medical professionals on board.

6.2 The Emergency Medical Kit (EMK) may only be opened by a doctor or nurse.

6.3 The AED is stored in the forward overhead locker at row 1.
